Oskar Gram Nielsen

Automation & AI Engineer · Copenhagen

oskargram1996@gmail.com · +45 24 23 25 17 · oskargramnielsen.info · oskar-gram-nielsen · oskargramnielsen

Profile

Automation and AI engineer with an MSc from DTU and three years shipping production software at the intersection of engineering domain knowledge and modern AI tooling. I embed with technical teams, map their workflows end-to-end, and build the systems that replace manual processes with scalable, intelligent solutions — communicating with equal clarity to engineers and senior stakeholders.

Experience

CN3 · Automation Engineer — 2023 – Present

- Built the project control system for one of the largest construction projects in the world: schedules, progress and documents from many contractors in one live overview, so delays show weeks ahead.
- Built AI assistants that answer from building models, drawings and documents with source references, on company-hosted GPUs so no data leaves the company.
- Automated recurring processes across Outlook, SharePoint, Teams and Excel with Power Automate and Power Apps.
- Engineered C# Revit plugins and REST integrations feeding BIM data into live dashboards and React / PostgreSQL tools.

Power Platform · Python · TypeScript · C# · LLMs · PostgreSQL

Gehl Architects · Student Assistant — 2021 – 2023

- Built parametric scripts that bring simulation results into early urban design.
- Modelled air quality in ENVI-met as decision material for planners.

Rudersdal Municipality · Student Assistant — 2020 – 2021

- Documented technical installations in public buildings.

Projects

Andelskortet

Founder & developer · 2023 – Present

Free map of every housing co-op in Copenhagen and its waiting list, used by 24,000+ people. Scrapers and LLM classification keep the data current.

Veritrace

Founder & developer · SaaS · 2025 – Present

AI-assisted life-cycle assessment for Danish construction: imports BIM models, matches materials to EPD data and checks CO_2 against BR18 climate requirements.

Cloud-based LCA & BIM

MSc thesis with Rambøll

Connected Revit to the LCAbyg API so life-cycle assessments update automatically.

Rainwater particle simulation

BSc thesis with Bjarke Ingels Group

Particle-based simulation of urban rainwater flow to inform drainage design.

Skills

Microsoft automation	Power Automate, Power Apps, SharePoint, Teams, Outlook, Excel
AI	LLMs, Document Q&A (RAG), AI agents, Self-hosted models
Code	Python, TypeScript, C#, React, SQL / PostgreSQL
Integration & data	REST APIs, Web scraping, Data pipelines, CI/CD
AI dev tools	Claude Code
Engineering	BIM, Revit API, Grasshopper

Education

Technical University of Denmark (DTU)
MSc Architectural Engineering · 2017 – 2023
GPA 11.1 / 12 · Blue Dot Diploma (Solar Decathlon China)

Hong Kong Polytechnic University
Exchange semester · 2019

Also

Languages
Danish (native), English (fluent)

Outside work
Lifeguard on Australia's west coast · Certified ski instructor in Japan
