

Oskar Gram Nielsen

Engineer from DTU working with automation, AI and digital solutions.

📍 Copenhagen, Denmark, CET

www.oskargramnielsen.info / oskargram1996@gmail.com / [+45 24 23 25 17](tel:+4524232517)

About

I turn manual processes into working digital solutions – automations, internal apps and AI agents. I like starting with the business problem and staying hands-on all the way to something people actually use, mostly in the Microsoft ecosystem and with code where it adds value.

Work Experience

CN3 Power Platform LLMs C# Python React PostgreSQL

2023 - Present

Automation Engineer

Digitalising manual workflows across engineering and project teams – from understanding the process to building, testing and handing over the solution.

- Automated recurring processes with Power Platform and Power Automate
- Built internal full-stack apps (React, PostgreSQL) used daily by project teams
- Used LLMs to speed up document- and data-heavy tasks
- Engineered custom C# plugins and REST integrations between systems

Self-Employed (Andelskortet) TypeScript React Web Scraping LLMs

2023 - Present

Founder & Developer

Solo-built housing map for Copenhagen – automated data collection and cleaning behind a live web app.

Gehl Architects Python Grasshopper Rhino

2021 - 2023

Student Assistant

Built scripting tools and ran simulations for early-stage urban design projects.

Rudersdal Municipality Revit Excel

2020 - 2021

Student Assistant

Analyzed and documented technical building installations.

Education

Technical University of Denmark (DTU)

2017 - 2023

Master of Science in Architectural Engineering

GPA: 11.1 / 10.0 (incl. courses outside of Arch. Eng.)

Polytechnic University of Hong Kong (PolyU)

2019 - 2019

Exchange in Architectural Engineering

Skills

Power Platform

Power Automate

LLMs & AI Agents

Python

C#

TypeScript

React

PostgreSQL

REST API

Grasshopper

Side projects

Andelskortet •

Live map of cooperative housing in Copenhagen, with automated data collection behind it.

TypeScript React Automation

LLMs

Cloud-Based LCA & BIM Solution

Master's thesis with Rambøll: connecting two APIs so sustainability data flows automatically between systems.

C# REST API Revit API

Solar Decathlon China •

Optimised a solar roof design in an international competition; awarded DTU's Blue Dot Diploma.

Computational Design

Renewable Energy

Rainwater Particle Simulation Tool

Bachelor thesis simulating urban rainwater flow with Bjarke Ingels Group.

Blender
